Features of the University

(1) History

International Christian University (ICU) was founded in 1949 with the cooperation of both Japanese and North American educators. The first students entered in 1953 when the College of Liberal Arts was opened. The Graduate School opened in 1957 with a program in education and has since added three more divisions: Public Administration (1963), Comparative Culture (1976), and Natural Sciences (1987). Finally, in April 2010, four graduate divisions aiming at interdisciplinary education were united and regenerated as the "Graduate School of Arts and Sciences". The master's level programs introduced a more liberal approach to graduate education and support studies in innovative fields spanning multiple disciplines.

(2) Location

ICU is set in a picturesque, serene, wooded campus in suburban Tokyo. Our campus provides a perfect setting for those pursuing graduate studies in the social sciences as one can focus on research in a quiet environment but also readily access downtown Tokyo – Japan's business center and government seat. It offers easy access to many of the government offices, world leading research institutions, UN agencies, and NGO/NPOs, as well as opportunities to develop a network among leading scholars and people working in the same field.

(3) University Data (*as of May 2023)

Number of Undergraduate Students: 2,976 Number of Graduate Students: 216 (Master's course: 156, Doctoral course: 60, One-Year-Regular: 0)

Number of faculty and full-time educational staff: 150 (Japanese: 94/ non-Japanese: 56)

(4) Basic Policy

Founded on the principles of Christianity and the Universal Declaration of Human Rights, ICU aims to cultivate 'responsible global citizens' who contribute to world peace. Explicit in its name, ICU has been a pioneer in liberal arts education in Japan since its founding in 1953, pursuing international, Christian and academic ideals. The Graduate School, in accordance with the ideals and purposes of ICU, aims to enable students to master advanced levels of learning in specific fields. The Graduate School's programs continue to attract the brightest students from around the world. This may be due to various reasons, including the relatively small size of our graduate programs, where every student has the advantage of enjoying the full attention of many faculty members and not just one academic advisor. Additionally, bilingual liberal arts instruction in English and Japanese enables ICU students from all over the world to think about and discuss ideas using a common language. Furthermore, graduate students can select from a wide range of research areas, from major classical disciplines in social sciences, arts and humanities, and natural sciences to interdisciplinary studies and new emerging fields.

Features of the Graduate School

(1) Graduate School of Arts and Sciences

ICU's reformed Graduate School of Arts and Sciences started offering its programs from April 2010. The master's level programs, enriched with new courses, 1) introduce a more liberal approach to graduate education by promoting transferable skills, 2) offer school-wide interdisciplinary courses, and 3) support studies in innovative fields spanning multiple disciplines. ICU's graduate school and faculty are devoted to cultivating professionals: superlative minds in their fields with deep insight into real policy issues. The graduate program provides a highly competitive, theoretical, empirical, policyoriented international education, which contributes to solving real policy issues in developing countries and the world at large.

(2) Basic Policy for Accepting JDS Fellows

All faculty and staff are happy to provide learning opportunities for JDS Fellows who work to acquire specialized knowledge in solving social and economic development issues, which their own countries might confront. We expect very high quality and promising students who are strongly motivated to achieve academically and return to their home country with the skills necessary to contribute. Furthermore, to effectively manage admission of JDS Fellows to the program, ICU has organized a 'JDS Committee,' which has discussed how to meet JDS Fellows' academic needs in the admissions process. To accomplish this goal, the JDS committee is devoted to developing and initiating new designs of courses and special seminars and inviting renowned guest professors and speakers for JDS Fellows.

< Faculty Expertise >

To contribute to the international environment at ICU, the faculty comes from diverse countries and has global work experience, including in developing countries. Many faculty members have work experience in international organizations such as the Asian Development Bank (ADB), the World Bank, JICA and various United Nations (UN) programs and agencies and can supplement their teaching with practical experiences. They have a deep understanding of the social and economic development issues of ASEAN and can offer individual guidance based on students' interests and needs.

< Guiding Principles >

School-wide interdisciplinary courses, such as 'Writing for Researchers', and 'Data Analysis for Researchers' provide all graduate school students necessary skills for research at the graduate school level. Students are also able to take courses of ICU's undergraduate program to deepen and expand their understanding and basic knowledge of their field if necessary.

< Guidance and Advisors >

Upon enrollment each student is assigned to an academic advisor who is a full-time professor. The advisor works closely with the student as a mentor to develop an effective research plan. In the first year, students take school-wide interdisciplinary courses, foundation courses and specialization courses in their area of concentration and receive guidance in their research by their academic advisor. Through this guidance students can acquire basic knowledge and skills for the master's course.

During the second year, students concentrate more on thesis research. Academic advisors give students precise and proper guidance in order to successfully complete their master's thesis. During the writing of the master's thesis, second and third advisors are assigned to provide more academic guidance to students from different perspectives.

To promote hands-on mentoring, ICU faculty have a policy of setting aside at least two hours each week as designated office hours, when students can visit faculty for any reason without requiring an appointment. Moreover, each student meets individually with his or her advisor for registration each term. These college-wide policies are in addition to the regular mentoring and academic advising that graduate student receive related to their courses and thesis progress.

< Classmates >

At ICU Graduate School, students from many countries study together. Japanese and non-Japanese peers appreciate this diversity and learn from each other's differences. A tradition of open-mindedness continues to be a salient feature of campus life at ICU. ICU Graduate School has accepted about 10 students as 'Rotary Peace Scholars' every year, who come from countries all around the world, and, just as JDS Fellows do, they possess working experience and through their graduate studies aim to prepare themselves for future contributions to peace building, conflict resolution and development. Bringing together students with such diverse backgrounds and experiences provides even more opportunities for students to learn from each other.

< Japanese Language Program >

ICU offers a Japanese Language Program (JLP) in which students can take courses depending on each student's level of Japanese ability. JLP has been recognized for its excellence and prepares students to use Japanese for academic purposes. ICU has also started to offer new JLP course especially for graduate students who wish to achieve primary level Japanese.

Features of the Programme

ICU Graduate School of Arts & Sciences is well known for its interdisciplinary program. The Public Policy & Social Research Program enables students to learn not only from one area of Public Policy and Public Administration, but also development studies, from international relations, public economics, sociology and anthropology, media and communication studies, and peace studies. This aims to develop a broad view and wide knowledge of students, and it leads to cultivate experts with capacity of problem-solving and plenty of knowledge which are essential to the professional officers in developing countries. The Program offers theoretical as well as methodological courses on qualitative and quantitative analysis, and field research methods, which are necessary for students' research. The faculty is highly experienced in various international organizations and serves as a body of skilled educators. Primary advisors and other faculty members eagerly share the common agenda of JDS Fellows and support and guide JDS Fellows in order to aid in their education.

<Other Opportunities>

In addition to coursework and research, there are various enrichment activities and opportunities at ICU for JDS Fellows.

(1) The JDS forum and Workshop for Development Studies

ICU organizes several JDS forums during the year. These forums invite professionals from international organizations, governments, NGOs and others, to discuss diverse issues of developing countries.

(2) Seminars jointly hosted with other universities / organizations

ICU has conducted Joint Seminars with other universities, which offered an opportunity for JDS Fellows to gain experience presenting their research and to receive feedback from faculty on how to develop their ideas. This seminar Fellows' research improves JDS and presentation skills and enhances the network between both faculty and JDS fellows at the cosponsored universities. Additionally, JDS Fellows can participate in the United Nations University Global Seminar that is held as a joint seminar by the UN University and 10 other cooperating universities (including ICU). Participation in this seminar is to deepen awareness and understanding of the roles of the states, the UN, civil society and private sector in global governance.

Students are also encouraged to take advantage of ICU's location in Tokyo by attending various International Conferences, especially those related to their research.

(3) Skill Training

Skill training such as Project Cycle Management Training and Evaluation Methods are provided when regular classes are not in session. And several workshops including library database workshop, research design, mid-term presentation and farewell symposium are systematically provided to enhance students' capability.

Faculty

Faculty members who can supervise JDS fellow are listed below:

https://www.icu.ac.jp/en/academics/gs/faculty /index.html

Student Support System

Support for international students: The related departments of the university such as Graduate School Group and Student Affairs Group, and Academic Affairs Group etc. cooperate to support their campus life. At ICU, faculty members and students with various

nationalities and cultural backgrounds learn and work together. Both Japanese and English are official languages, and all faculty members can support students in English. The counseling center is also available in English.

< Dormitories >

ICU has several dormitories for Graduate Students in the Student Life Zone on campus and new dormitories opened in April of 2017. There are some floors which mainly have single rooms to accommodate graduate students and students with diverse needs.

For more details:

https://www.icu.ac.jp/en/campuslife/dormitori es/index.html

< Library >

Since its opening in 1960, the library has always been at the center of the university's academic information services. Its collection of more than 790 thousand volumes in Japanese, English and other languages cover a multitude of subjects in response to the needs the College of Liberal Arts and Graduate School. In 2000, the new Mildred Top Other Library was opened. This was the first library in Japan which introduced an automated book storage and retrieval system.

On the ground floor, there are multimedia room and the study area where PCs are available (rental service possible). The Center for Teaching and Learning (CTL) is located on the first floor, accommodating Learning Support Office, Educational Support Office, group learning area and group study rooms.

The ICU Archives and Special Collections and the Special Needs Support Office are in the main Library.

< Sports Facilities >

There are two gymnasiums on campus. Physical Education Center A, which was completed in 2018, houses the main court, a studio, and seminar rooms in which physical education lectures can be conducted. Physical Education Center B, which was completed in 1972, houses rooms for ball games, martial arts, and weight training. Other physical education facilities include a swimming pool, which was completed at the same time as Physical Education Center A, and the Central Locker Building, which was completed in 2001 and houses locker rooms, shower rooms, offices for faculty in the Physical Education Program, etc. In addition, there are also roofed tennis courts, a baseball field, a soccer/rugby field, an archery range, etc.

< Club Activities >

ICU has many excellent and international club activities, which are open to ALL students. For example, there are activities for UNESCO, UN, English debate circle, etc. Also, there are numerous cultural club activities, such as modern jazz, classical music, Japanese tea ceremony, Japanese traditional dance, and others.

< Counseling >

At the Counseling Center, counselors are available to discuss psychological issues with students in English and help them deal with other personal concerns at the university. https://sites.google.com/info.icu.ac.jp/icucoun selingcenter-english/home?authuser=0

Japanese culture experience / regional exchange: There are many opportunities for exchange between international students and local residents through activities such as local volunteers, introduction of different cultures at cultural facilities, and storytelling of English books in collaboration with local NGOs.

Extra-curricular activities https://www.icu.ac.jp/en/campuslife/club

< Health Services >

Consisting of the university physician and nurses who can speak English, the Health Care Office (HCO) is equipped for the health of students, faculty and staff, as well as for campus environmental health conditions and health education programs.
