Features of the University

On November 12, 1857, Dutch army surgeon Pompe van Meerdervoort initiated medical lectures in the Dutch language to government doctor Ryojyun Matsumoto and 11 other persons. This medical school called Igaku Denshusho is the origin of today's School of Medicine as well as Nagasaki University.

Features of the Graduate School

Along with the globalization of the economy, industry, and mass migrations in the 21st century, problems relating to the natural and social environment have also become globalized. In particular, infectious diseases, mental health issues and lifestyle related illnesses are particularly affected by changes in our environment, requiring new ways and methods

to counter them that transcend countries and regions, known as "global health". The school of Tropical Medicine and Global Health (TMGH) aims to go beyond the existing academic boundaries, using a new comprehensive approach to solve world health problems and train new professionals in "Global Health" who can be called upon internationally for this purpose.

Features of the Programme

We aim to nurture professionals with a global perspective who can contribute to the health and happiness of people around the world. The following four aspects summarize the key capabilities of students once they fulfil the requirements of a master's degree at TMGH.

- 1. Expertise
 - Students develop skills and expertise in tropical medicine, global health, and health innovation and have the capacity to use these skills.
- Communication and Teamwork
 Students have a broad and fundamental
 knowledge of global health allowing them to
 communicate with various professionals in
 English in order to solve global health
 challenges.
- 3. Professionalism

Students will have knowledge, skills, professionalism, and fortitude. They will be highly advanced professionals who can contribute to the advancement of global health.

4. Leadership and Followership
Students possess the aforementioned
capabilities as well as demonstrate leadership
and followership qualities to fulfil their
responsibility as members of an international
and integrated global health team.

Student Support System

Nagasaki University Center for Japanese Language and Student Exchange supports students' ambitions for international experiences by offering cross-cultural opportunities. Our center provides Japanese language education to students from other institutions who are interested in studying in a Nagasaki University program.
