Features of the University

Nagoya University has a 144-year history, dating from when the Temporary Medical School/Public Hospital the forerunner of today's Nagoya University was established in 1871. The University became the last Imperial University of Japan in 1939, and the educational reforms in 1949 led to the beginning of Nagoya University under the new education system. From that time to this day, the University has been pursuing steady development.

With its free and vibrant academic culture, which has been passed down since its foundation, Nagoya University has been stepping up efforts to achieve two fundamental objectives stated in the Nagoya University Academic Charter established in 2000: "Nagoya University, through creative research activity, shall pursue the truth and produce results of

scholastic distinction on the international stage," and "Nagoya University, through an education that values initiative, shall cultivate courageous intellectuals endowed with powers of rational thought and creativity."

Features of the Graduate School

The Graduate School of International Development (GSID) pursues a mission to promote understanding of the problems we face in the globalizing world and to create a sustainable society by contributing to policy-making and implementation by international organizations, governments, and civil society organizations. In order to find solutions to contemporary problems, technical approaches are often not enough. We need to understand the existing policy frameworks and apply innovative thinking based on social science perspectives. GSID thus attempts to cultivate courageous intellectuals capable of finding such solutions by promoting policy-oriented, interdisciplinary research and teaching in cooperation with a network of academic and research institutions and implementing agencies. Our objectives are as follows:

1. Promote empirical research based on social science theories and methods that can inform the policy-making and implementation processes of the international community, governments, and civil society;
2. Train professionals who can contribute to state- or community-building cooperation with the international community and with a full understanding of national and local realities;

3. Expand our worldwide network with governments, universities, and international organizations through research and teaching in order to realize sustainable development and just societies on the global level.

Features of the Programme

The Economic Development Policy and Management (EDP&M) program deals with the issues and topics pertaining to Economic Development that constitute the core of socio-economic development. This program trains students to become career development economists or otherwise experts in economic development who can contribute to poverty reduction through economic growth via increased income and/or employment creation. Facing the multi-dimensional development problems of the 21st century, development economists who are well-versed in New Political Economy—a fusion of politics, economics, and culture — are needed. In addition to the basic subjects for economic development such as Development Economics, Development Macroeconomics, Development Microeconomics and Statistics/Econometrics, the EDP&M program offers the following focal areas while preparing students for their professional careers: Poverty-Growth-Inequality Triangle, Globalization and Development, Rural Economics and Development, Industrial Development, Tourism Economics and Development, Development Finance and Public Financial Management, among other related areas. The EDP&M program also possesses a global network of development policy makers, practitioners and researchers consisting of our program alumni and collaborating researchers and practitioners, for us to tap into their accumulated knowledge and experience in managing economic development.

Curriculum
