

Notice to potential applicants to the International University of Japan, Graduate School of International Relations

IUJ(GSIR) has been offered MA in Public Management.

From this year, the faculty offers MA in Public Policy additionally.

1. MA (Public Management): Emphasis on developing the ability to analyze public sector problems from a management perspective and contribute to more efficient management

2. MA (Public Policy) Emphasis on developing the ability to analyze and propose policies

Between the two-degree programmes, there is no significant difference in curriculums.

However, MA (Public Policy) requires more data analysis skills. Therefore, students have to take more economics courses.

At the time of the **Comprehensive Interview** in March 2023, applicants will choose the anticipated degree and notify the faculty.
