

Saitama University

Graduate School of Science and Engineering

Address: 255 Shimo-Okubo, Sakura-ku, Saitama-shi, Saitama, 338-8570 JAPAN

	Programme Name
	International Graduate Programme on Civil and Environmental Engineering
	Degree
	Master of Engineering
	Credits and years required to graduate
	30 Credits, 2 Years
	Prerequisite
	Undergraduate level academic knowledge of Civil Engineering
	Math Exam
	Required
	Acceptance Quota
2 students per batch

Features of the University

Saitama University is a reputable national university for higher education and research in Japan. The university consists of five faculties: Faculty of Liberal Arts, Faculty of Education, Faculty of Economics, Faculty of Science, and Faculty of Engineering. There are three graduate schools in the university: Graduate School of Humanities and Social Science, Graduate School of Education, and Graduate School of Science and Engineering. Total number of full-time students as of May 2020 was 8,321 students, among which the number of undergraduate students was 6,804 and the number of graduate

students (master's and doctoral courses) was 1,517. Saitama University is located in a quiet suburban area of Saitama City, the capital of Saitama Prefecture. Saitama City is located 30 kilometres north of metropolitan Tokyo. Access to central Tokyo takes about an hour from the university by East Japan Railway and is very convenient. This enables residents of the university to access many libraries and research facilities in the Tokyo area.

Features of the Graduate School

Building on the basic education provided at the undergraduate level in respective fields of specialization, the master's programme gives students an advanced specialized education that aims to impart broadly related knowledge that not only focuses on each field of specialization, but spans the spectrum from basic to applied knowledge. This approach produces graduates who are equipped with the foundations for growing into creative, international-level researchers and advanced, specialized professionals who will be able to play a leading role in today's international knowledge-oriented society.

Feature of the Programme

The International Graduate Programme on Civil and Environmental Engineering offers Master Engineering Degrees in a broad range of civil and environmental engineering fields. To qualify for the conferment of a Master of Engineering Degree, students must satisfy the following requirements:

- The standard period of full-time attendance to fulfil the requirement of the degree is two years. In exceptional cases, the degree may be conferred after studying for one year, as the minimum period, having fulfilled other requirements.
- A minimum of 30 credits beyond the bachelor's degree is required, including 10 credits awarded for a thesis.
- A thesis based on the research carried out under the supervision of a thesis adviser must be completed and satisfactorily presented.

Our faculty members are engaged in a wide range of research in the field of civil and environmental engineering. Major research topics include, but are not limited to, geotechnology for disaster prevention, earthquake engineering and earthquake disaster mitigation engineering, structures and mechanics, concrete structures, strengthening and rehabilitation of civil infrastructures, planning and design of transportation infrastructures, environmental engineering, and ecological engineering.

Faculty

List of faculty members who can take JDS fellows under their supervision is as follows:

Professors		Research Fields	
Jiro Kuwano	Geotechnical Engineering		
Ken Kawamoto	Geoenvironmental Engineering		
Masahiko Osada	Rock Engineering, Earth Science		
Taro Uchimura	Geotechnical Engineering, Geohazards Prevention Engineering		
Masato Saitoh	Earthquake Engineering, Earthquake Disaster Prevention		
Takeshi Maki	Concrete Engineering, Bridge Engineering, Construction Materials		
Yoshiaki Okui	Structural Engineering, Composite Structures, Bridge Engineering		
Yasunao Matsumoto	Structural Engineering, Environmental Vibration		
Norio Takana	River Engineering, Disaster Prevention, Ecology and Environmental Preservation		
Takeshi Fujino	Environmental Studies, Environmental Engineering		
Hisashi Kubota	Urban Transportation Planning		
Associate Professors		Assistant Professors	
Chiaki Oguchi	Ji Dang	Adnan Anwar Malik	Senavirathna M.D.H
Hidenori Mogi	Junji Yagisawa	Yota Togashi	Yoshiya Igarashi
Hisashi Taniyama	Aya Kojima	Chandra Shekhar Goit	Tepei Kato
Shingo Asamoto	Kiyotaka Fukahori	Yao Luan	

List of offered courses

List of courses that can be taken by JDS fellows is as follows:

- Advanced Analysis of Vibrations and Waves
- Advanced Course in Technical English III
- Advanced Course in Transportation System
- Advanced Geoenvironmental Engineering
- Advanced Lectures on Construction Materials
- Advanced Lectures on Strong Motion
- Advanced Nonlinear Structural Analysis
- Advanced Reinforced Concrete Engineering
- Advanced Theory on Earthquake Engineering
- AI and Data Science for Civil Engineering
- Bridge Design
- Climate and Society
- Construction Management
- Environmental Vibration and Noise
- Finite Element Analysis
- Geosphere System Engineering
- Geotechnical Earthquake Engineering
- Landscape Planning and Design
- Mechanics of Geomaterials
- Mechanics of Geostuctures
- Numerical Analysis on Hydraulic Environment
- Practical Numerical Simulation on Hydraulic Environment
- Practical Structural Dynamics Simulation
- Special Lectures on Planning Mathematical Science
- Structural Dynamics and Control
