#### Features of the University

Yamaguchi Prefecture is located on the western edge of Honshu Island and is surrounded on three sides by the ocean. Although Yamaguchi University may not provide bustling city life like in Tokyo, we do provide high quality education and the opportunity to engage in cutting-edge research, all in a peaceful and safe environment. Yamaguchi University traces its origins back to Yamaguchi Kodo, a private school, founded by Ueda Hoyo, a feudal clansman of Choshu Province in the late Edo Period (1815). In 1949 it was reorganized to become a national university consisting of five faculties. Throughout the years, university has expanded comprehensive university boasting nine faculties and nine graduate schools.

## Features of the Graduate School

The Graduate School of Economics was founded in 1975 and provides education in two majors: Economics, and Business Administration. It

shares the ethos of "self-restoration" with its parent institution. With a view to meeting the needs of contemporary society, this ethos espouses a spirit that is not afraid of self-change, while maintaining the strength of purpose founded on a robust core. The foremost mission and objective of the School is to train specialists to identify issues in our increasingly complex and fluid contemporary society, and to seek comprehensive solutions, equipped with competence in the social sciences and the ability to clearly articulate their own views and opinions.

## Features of the Programme

The Public Administration Course employs experienced professors in the field of policy development projects in various Asian developing countries as well as experts in East Asian studies. Specialized professors designated to work with JDS fellows provide practical guidance and supervision to meet fellows' specific needs. The course is specifically and carefully designed to be implemented systematically and consistently to develop the academic capabilities and experience of international students. If a research proposal requires interdisciplinary guidance, multiple professors can be available for joint instruction specific to the student's needs.

The Graduate School has two professors in public administration-related disciplines with experience in providing their knowledge to several ODA projects over more than 20 years, including projects funded by the World Bank, ADB, JBIC and JICA. Such experience is used to its full extent to guide international students in finding solutions to their specific issues.

The Graduate School understands that human resource development in: 1) management of public policy, 2) decentralization of public administration, and 3) improvement of governance and anticorruption, is crucial to

building a stable nation, and aims to train students to be talented professionals capable of leading in their fields, while exhibiting expertise in solving various problems from a broad range of perspectives related to public administration.

## Faculty

List of prospective academic supervisors of JDS fellow is shown blew.
